| Project Name  | <b>Virtual Agent–Driven SLA Breach Awareness &amp; Justification System</b> |
| Maximum Marks |                                                                             |

## Project Overview:

### Project Name:

**Virtual Agent–Driven SLA Breach Awareness & Justification System**

### Project Description:

A ServiceNow-based SLA governance solution that proactively identifies SLA breach risks, sends automated notifications, enforces mandatory breach justification through UI Policies, enables acknowledgement using Virtual Agent, and provides real-time reporting and dashboard analytics for SLA monitoring.

### Project Version:

Version 1.0

## Testing Scope

### Features and Functionalities to be Tested

- Incident Creation
- SLA Attachment and SLA Timer
- SLA At Risk Detection
- Email Notification Trigger
- UI Policy for Justification
- Virtual Agent Interaction
- SLA Acknowledgement
- SLA Breach Reporting
- Dashboard Visualization
- Pending Justification Monitoring

## Testing Environment

**Platform:** Service Now Developers Instances

## Test Cases

| Test Case ID | Test Scenario                         | Test Steps                                                         | Expected Result                        | Actual Result                 | Pass/Fail |
|--------------|---------------------------------------|--------------------------------------------------------------------|----------------------------------------|-------------------------------|-----------|
| TC-001       | Incident Creation                     | 1. Create Incident2. Save Record3. Verify Incident                 | Incident created successfully          | Incident created successfully | Pass      |
| TC-002       | SLA Attachment & Running              | 1. Open Incident2. Verify SLA3. Check Timer                        | SLA attached and timer starts          | SLA attached successfully     | Pass      |
| TC-003       | SLA At Risk Trigger                   | 1. Reduce SLA Time2. Wait for Threshold3. Refresh Record           | SLA At Risk becomes True               | Trigger executed successfully | Pass      |
| TC-004       | SLA Notification Email                | 1. Trigger At Risk2. Check Notifications3. Verify Email            | Email notification received            | Email delivered successfully  | Pass      |
| TC-005       | UI Policy – Assignee Access           | 1. Open At Risk Incident2. Edit Record3. Verify Field              | Justification field mandatory          | UI Policy works correctly     | Pass      |
| TC-006       | Virtual Agent Invocation              | 1. Launch Virtual Agent2. Select SLA Topic3. Continue Conversation | Virtual Agent starts successfully      | VA launched successfully      | Pass      |
| TC-007       | SLA Acknowledgement                   | 1. Submit acknowledgement2. Save Response3. Verify Record          | Acknowledgement stored                 | Acknowledgement recorded      | Pass      |
| TC-008       | SLA Breaches by Reason Report         | 1. Open Report2. Load Data3. Verify Chart                          | Report displays breach reasons         | Report generated correctly    | Pass      |
| TC-009       | Acknowledged vs Unacknowledged Report | 1. Open Report2. Verify Data                                       | Report displays acknowledgement status | Report generated correctly    | Pass      |
| TC-010       | Pending Justifications Report         | 1. Open Report2. Verify Pending Records                            | Pending records displayed              | Report generated correctly    | Pass      |
| TC-011       | SLA Governance Dashboard              | 1. Open Dashboard2. Verify Widgets                                 | Dashboard displays governancemetrics   | Dashboard working correctly   | Pass      |

### Bug Tracking

| Bug ID | Bug Description                                               | Steps to Reproduce                       | Severity | Status | Additional Feedback          |
|--------|---------------------------------------------------------------|------------------------------------------|----------|--------|------------------------------|
| BG-001 | Dashboard widget alignment issue during initial configuration | 1. Open Dashboard2. Add Widget3. Refresh | Low      | Closed | Layout adjusted successfully |
| BG-002 | Report filter configuration mismatch                          | 1. Open Report2. Apply Filter3. Execute  | Medium   | Closed | Filter condition corrected   |
| BG-003 | Dashboard refresh delay                                       | 1. Update Incident2. Refresh Dashboard   | Low      | Closed | Performance optimized        |
