

Acceptance Testing

UAT Execution & Report Submission

Date	
Team ID	
Project Name	Virtual Agent–Driven SLA Breach Awareness & Justification System
Maximum Marks	4 Marks

1.Purpose of Document

This document validates that the Virtual Agent–Driven SLA Breach Awareness & Justification System functions according to the defined business requirements. Acceptance testing ensures that all workflows, notifications, Virtual Agent interactions, reporting, and dashboard functionalities operate correctly before deployment. The document records test execution results, confirms expected outcomes, and verifies that the solution is ready for end-user adoption.

2.Defect Analysis

The acceptance testing phase identified only minor configuration-related issues during initial testing, such as report formatting and dashboard layout alignment. These defects were corrected through configuration updates without requiring changes to the core application logic. After retesting, all eleven test cases passed successfully, confirming that the solution performs reliably and satisfies the defined functional requirements.

UAT (User Acceptance Testing) Execution Report

Test Case ID	Module	Status	Remarks
TC-1	Incident Creation	Pass	Incident created successfully.
TC-2	SLA Attachment & Running	Pass	SLA attached and timer started correctly.
TC-3	SLA At Risk Trigger	Pass	At Risk status updated automatically.
TC-4	SLA Notification Email	Pass	Notification email delivered successfully.
TC-5	UI Policy – Assignee Access	Pass	Mandatory justification field displayed correctly.
TC-6	Virtual Agent Invocation	Pass	Virtual Agent launched when

			SLA became At Risk.
TC-7	SLA Acknowledgement via Virtual Agent	Pass	User acknowledgement stored successfully.
TC-8	Reporting – SLA Breaches by Reason	Pass	Report generated with accurate breach reasons.
TC-9	Reporting – Acknowledged vs Unacknowledged	Pass	Report displayed correct acknowledgement statistics.
TC-10	Reporting – Pending Justifications	Pass	Pending justifications listed correctly.
TC-11	Dashboard – SLA Governance View	Pass	Dashboard displayed all KPIs and reports correctly.
